Barclays Index Administration ("BINDA"), a distinct function within BB PLC, is responsible for day-to-day governance of BB PLC's activities as Index Sponsor.

To protect the integrity of Barclays' indices, BB PLC has in place a control framework designed to identify and remove and/or mitigate (as appropriate) conflicts of interest. Within the control framework, BINDA has the following specific responsibilities:

- oversight of any third-party index calculation agent;
- acting as approvals body for index lifecycle events (index launch, change and retirement); and
- resolving unforeseen index calculation issues where discretion or interpretation may be required (for example: upon the occurrence of market disruption events).

To promote the independence of BINDA, the function is operationally separate from BB PLC's sales, trading and structuring desks, investment managers, and other business units that have, or may be perceived to have, interests that may conflict with the independence or integrity of Barclays' indices.

Notwithstanding the foregoing, potential conflicts of interest exist as a consequence of BB PLC providing indices alongside its other businesses. Please note the following in relation to Barclays' indices:

- BB PLC may act in multiple capacities with respect to a particular index including, but not limited to, functioning as index sponsor, index administrator, index owner and licensor.
- Sales, trading or structuring desks in BB PLC may launch products linked to the performance of a index. These products are typically hedged by BB PLC's trading desks. In hedging an index, a trading desk may purchase or sell constituents of that index. These purchases or sales may affect the prices of the index constituents which could in turn affect the level of that index.
- BB PLC may establish investment funds that track an index or otherwise use an index for portfolio or asset allocation decisions.

The Index Sponsor is under no obligation to continue the administration, compilation and publication of the Index or the level of the Index. While the Index Sponsor currently employs the methodology ascribed to the Index (and application of such methodology shall be conclusive and binding), no assurance can be given that market, regulatory, juridical, financial, fiscal or other circumstances (including, but not limited to, any changes to or any suspension or termination of or any other events affecting any constituent within the Index) will not arise that would, in the view of the Index Sponsor, necessitate an adjustment, modification or change of such methodology. In certain circumstances, the Index Sponsor may suspend or

terminate the Index. The Index Sponsor has appointed a third-party agent (the 'Index Calculation Agent') to calculate and maintain the Index. While the Index Sponsor is responsible for the operation of the Index, certain aspects have thus been outsourced to the Index Calculation Agent.

Barclays

- a. makes no representation or warranty, express or implied, to the Issuer or any member of the public regarding the advisability of investing in transactions generally or the ability of the Index to track the performance of any market or underlying assets or data; and

Barclays has no obligation or liability in connection with administration, marketing or trading of the Delaware Life Target Growth 10[®].

The licensing agreement between Delaware Life Insurance Company and BB PLC is solely for the benefit of Delaware Life Insurance Company and Barclays and not for the benefit of the owners of the Delaware Life Target Growth 10[®], investors or other third parties.

Irrespective of its obligations towards the issuer of any Product, Solactive has no obligation to point out errors in any Index to third parties including but not limited to annuity owners and/or financial intermediaries of the Product. Neither publication of any Index by Solactive nor the licensing of any Index or Index trade mark for the purpose of use in connection with any Product constitutes a recommendation by Solactive to invest in such Products nor does it in any way represent an assurance or opinion of Solactive with regard to any investment in such Products.

In calculating the level of any Index, the index methodology may deduct a maintenance fee. This fee will reduce the level of any Index and thus the Index's return, if any. Furthermore, any Index that includes a volatility control as part of the index methodology may result in less fluctuation in rates of return as compared to indices without volatility controls. It may also reduce the overall rate of return for products referencing such Index as compared to other indices not subject to volatility controls.
